

# WHAT IS VIRTUAL CLASSROOM?

## WHAT CAN I USE IT FOR?

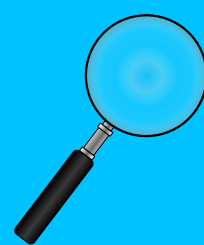

### Office Hours

Open the classroom and your students can drop in for advice and discussion online.

### Research Meetings

Send a link to your research collaborators in an email and you can discuss in live time and collaborate on shared documents.

### "Snow Day"

Should another snow day hit, Virtual Classroom will allow you to run your class online. Deliver your presentation straight to your students' devices in live time, share materials with them and receive their questions.

## HOW DIFFICULT IS IT?

EASY

- Get started by using the video function to start a dialogue with your students.
- Students can raise their hands if they have queries or drop questions into the chat.

INTERMEDIATE

- Share your screen so students can see what you can see.
- Share documents with the students.

ADVANCED

- Split your class into small breakout groups so they can interact on group activities.
